

Pinole's Financial Future: Join the Conversation

The City of Pinole has instituted many practices towards its fiscal sustainability and a safe, clean community. However, the City's current resources are not sufficient to meet some of the community's long-term needs, particularly park, road, infrastructure and other needs.

We have a responsibility to ensure the City continues to have money to address our community's needs.

That's why the City Council is considering placing a Charter City measure on the November ballot. Doing so could potentially allow the City to expand local revenue to maintain long term financial sustainability and services. **Please give us your feedback by ranking the following priorities from 1 to 6, with "1" being the most important. We will review all comments to ensure the City continues to address the community's priorities in its long-range planning:**

- The City's financial sustainability
- Maintaining safe play places for children
- Keeping streets, public areas, and parks clean
- Retaining/attracting local businesses
- Improving fire protection/911 response
- Upgrading storm drains

We invite your suggestions for additional service priorities: _____

Name: _____

Organizational Affiliation (if any): _____

Address: _____ Zip Code: _____
