Attn: Northville Planning Commission,

Re: The Downs - Preliminary Site Plan Review

On behalf of the City of Northville Department of Public Works, I do not see any outstanding issues that shall be address relative to city services during preliminary site plan.

The DPW, city engineers and the developer will continue to work together for all utility concepts and designs including water, sanitary and storm sewer. We will review and discuss onsite and offsite requirements for the development and the city's infrastructure.

Should you have any questions regarding my comments outlined above, please do not hesitate to contact me.

Thanks,

*M. Domine*
