Frequently Asked Questions
2021 Housing Element Update

1. What is a Housing Element?

State law requires each city to adopt a comprehensive, long-term General Plan for its physical development. General Plans include several "elements" that address various topics. The Grand Terrace General Plan includes the following elements:

- Land Use
- Circulation
- Open Space & Conservation
- Public Health and Safety
- Noise
- Public Services and Facilities
- Housing
- Sustainable Development

While most General Plans have a time horizon of 20-25 years, Housing Element updates must be prepared every 8 years. Housing Element planning periods are sometimes referred to as "cycles". Grand Terrace's current Housing Element covers the planning period extending from 2013 to 2021, which is referred to as the "5th Housing Element cycle" in reference to the five required updates that have occurred since the comprehensive revision to State Housing Element law in 1980. All cities within the Southern California Association of Governments ("SCAG") region are required to prepare a Housing Element update for the 6th cycle, which spans the 2021-2029 period. The SCAG region includes Los Angeles, Orange, Riverside, San Bernardino, Ventura and Imperial counties.

State law establishes detailed requirements for Housing Elements. The overarching purpose of the Housing Element is set forth in California Government Code Section 65583:

The housing element shall consist of an identification and analysis of existing and projected housing needs and a statement of goals, policies, quantified objectives, financial resources, and scheduled programs for the preservation, improvement, and development of housing. The housing element shall identify adequate sites for housing, including rental housing, factory-built housing, mobile homes, and emergency shelters, and shall make adequate provision for the existing and projected needs of all economic segments of the community.

2 https://www.grandterrace-ca.gov/departments/planning_development_services/planning
3 California Government Code Sec. 65580 et seq.
2. What is “certification” of the Housing Element and why is it important?

The State Legislature has delegated to the California Department of Housing and Community Development ("HCD") the authority to review Housing Elements and issue findings regarding the elements’ compliance with the law.\(^4\) When HCD issues a letter finding that the Housing Element is in substantial compliance it is referred to as “certification” of the Housing Element. HCD has determined that Grand Terrace’s current Housing Element is in full compliance with State law.

Housing Element certification is important for two main reasons:

- **Local land use control.** The General Plan and its various elements provide the foundation for the City’s land use plans and development regulations, and the Housing Element is part of the General Plan. If the City were challenged in court on a planning or zoning matter and the General Plan were found by the court to be invalid, the court could order changes to City land use plans or regulations and assume control over City land use decisions. HCD certification establishes a "rebuttable presumption of validity"\(^5\) that the Housing Element is adequate under State law, which would support the City’s legal defense. Recent laws also allow courts to impose fines if a jurisdiction fails to adopt a compliant Housing Element.\(^6\)

- **Eligibility for grant funds.** Some State grant funds are contingent upon Housing Element certification.

3. What are the most important issues that must be addressed in the Housing Element?

The major issues that must be addressed in the Housing Element are: 1) how City policies, plans and regulations help to address the region’s housing needs for households of all income levels; and 2) whether City land use regulations are consistent with State laws related to housing for persons with disabilities or other difficulties.

- **Accommodating Regional Housing Needs.** Under State law\(^7\) all cities are required to plan for additional housing to accommodate population growth as well as existing housing problems such as overcrowding and high housing cost. State law recognizes that cities generally do not build housing, since that is typically the role of private and non-profit developers and builders. However, cities are required to adopt policies and development regulations to encourage a variety of housing types that are affordable for persons of all income levels, including multi-family rental housing and accessory dwelling units ("ADUs"). The Regional Housing Needs Assessment ("RHNA") is the method by which each jurisdiction’s share of new housing needs is determined (see #5 below).

\(^5\) California Government Code Sec. 65589.3.
\(^6\) AB 101 of 2019
\(^7\) California Government Code Sec. 65583
• **Housing for Persons with Special Needs.** Under State law cities must also ensure that their plans and regulations encourage the provision of housing for persons with special needs including:

- Reasonable accommodation for persons with disabilities
- Residential care facilities
- Transitional and supportive housing
- Emergency shelters and low-barrier navigation centers

4. **What is “affordable” housing?**

By definition, housing is generally considered “affordable” when total housing cost, including utilities, is no more than 30% of a family’s gross income. State law establishes five income categories based on county median income as shown in Table 1.

<table>
<thead>
<tr>
<th>Income Category</th>
<th>% of county median income</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extremely low</td>
<td>Up to 30%</td>
</tr>
<tr>
<td>Very low</td>
<td>31-50%</td>
</tr>
<tr>
<td>Low</td>
<td>51-80%</td>
</tr>
<tr>
<td>Moderate</td>
<td>81-120%</td>
</tr>
<tr>
<td>Above moderate</td>
<td>Over 120%</td>
</tr>
</tbody>
</table>

Source: California Government Code Sec. 65584(f)

Affordable housing costs for all jurisdictions in San Bernardino County that correspond to these income categories are shown in Table 2.

<table>
<thead>
<tr>
<th>Income Category</th>
<th>Maximum Income</th>
<th>Affordable Rent</th>
<th>Affordable Price (est.)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extremely low</td>
<td>$26,500</td>
<td>$663</td>
<td>*</td>
</tr>
<tr>
<td>Very low</td>
<td>$39,500</td>
<td>$988</td>
<td>*</td>
</tr>
<tr>
<td>Low</td>
<td>$63,200</td>
<td>$1,580</td>
<td>*</td>
</tr>
<tr>
<td>Moderate</td>
<td>$93,000</td>
<td>$2,325</td>
<td>$375,000</td>
</tr>
<tr>
<td>Above moderate</td>
<td>Over $93,000</td>
<td>Over $2,325</td>
<td>Over $375,000</td>
</tr>
</tbody>
</table>

Assumptions:
- Based on a family of 4 and 2021 State income limits
- 30% of gross income for rent or principal, interest, taxes & insurance plus utility allowance
- 10% down payment, 3.75% interest, 1.25% taxes & insurance, $300 HOA dues
- For-sale affordable housing is typically at the moderate-income level

5. **What is the “RHNA” why is it important?**

Each California city is required to plan for new housing to accommodate its share of regional needs. The Regional Housing Needs Assessment (“RHNA”) is the process established in State law by which housing needs are determined.

---

¹ California Government Code Sec. 65583(a)(5)
² California Government Code Sec. 65584 et seq.
Prior to each planning cycle the total housing need for each region of California is determined by HCD based upon economic and demographic trends, existing housing problems such as overcrowding and overpayment, and additional housing needed to ensure reasonable vacancy rates and replace units lost due to demolition or natural disasters. The total housing need for the SCAG region is then distributed to cities and counties by SCAG based upon objectives and criteria established in State law.\textsuperscript{10}

In 2019 HCD determined that the total new housing need for the entire SCAG region in the 6\textsuperscript{th} Housing Element cycle is 1,341,827 units. SCAG then prepared the RHNA plan for the 6\textsuperscript{th} planning cycle, which allocates the total RHNA to the jurisdictions in the SCAG region.\textsuperscript{11} SCAG adopted the final RHNA plan in March 2021.

Table 3 shows the RHNA allocations for Grand Terrace, San Bernardino County, and the entire SCAG region.

\begin{table}[h]
\centering
\begin{tabular}{|l|c|c|c|}
\hline
 & Grand Terrace & San Bernardino County & SCAG Region \\
\hline
Housing allocation 2021-2029 & 630 & 138,110 & 1,341,827 \\
\hline
\end{tabular}
\caption{6\textsuperscript{th} Cycle RHNA: Grand Terrace, San Bernardino County and SCAG Region}
\end{table}

The RHNA also distributes total housing need to the income categories described in Question 4 above based on income characteristics for San Bernardino County as shown previously in Table 2. The 6\textsuperscript{th} cycle RHNA allocation by income category for Grand Terrace is shown in Table 4 (the extremely-low and very-low categories are combined for RHNA purposes).

\begin{table}[h]
\centering
\begin{tabular}{|l|c|c|c|c|}
\hline
 & Very Low & Low & Moderate & Above Moderate \\
\hline
 & 189 & 92 & 106 & 243 \\
\hline
Total & 630 \\
\hline
\end{tabular}
\caption{6\textsuperscript{th} RHNA by Income Category: Grand Terrace}
\end{table}

6. Is the RHNA a construction quota or mandate?

The RHNA allocation identifies the amount of additional housing a city would need in order to have enough housing at all price levels to fully meet the needs of its existing population plus its assigned share of projected growth over the next 8 years while avoiding problems like overcrowding and overpayment (see #8 below). The RHNA is a planning requirement based upon housing need, \textit{not a construction quota or mandate}. Cities are not required to build housing or issue permits to achieve their RHNA allocations, but some provisions of State law establish specific requirements when housing production falls short of RHNA allocations. One such requirement is streamlined review and approval of housing development applications that meet specific standards.\textsuperscript{12} Other than requirements for streamlined permit processing, there are

\begin{itemize}
\item California Government Code Sec. 65584(d)
\item \url{https://scag.ca.gov/housing}
\item California Government Code Sec. 65913.4 (SB 35 of 2017)
\end{itemize}
currently no legal or financial penalties imposed on cities that do not achieve their RHNA allocations as long as a Housing Element has been adopted in compliance with State law.

7. What must cities do to comply with the RHNA?

The Housing Element must analyze the city’s capacity for additional housing based on an evaluation of land use patterns, development regulations, potential constraints (such as infrastructure availability and environmental conditions) and real estate market trends. The analysis must be prepared at a parcel-specific level of detail and identify properties (or “sites”) where additional housing could be built consistent with current regulations. This evaluation is referred to as the “sites analysis” and State law requires that the analysis demonstrate that the city has adequate capacity to fully accommodate its RHNA allocation in each income category. If the sites analysis does not demonstrate that adequate capacity exists to fully accommodate the RHNA, the Housing Element must describe steps that will be taken to increase capacity commensurate with the RHNA – typically through amendments to land use and zoning regulations that could facilitate additional housing development. Such amendments generally include increasing the allowable residential density or allowing housing to be built in areas that are currently restricted to only non-residential land uses.

8. Why is the RHNA allocation so much higher than in the past?

SCAG’s total RHNA allocation for the 6th cycle is 1,341,827 units compared to 412,137 units in the 5th cycle. There are two main reasons why the region-wide 6th RHNA allocation is so much higher than the 5th cycle.

First, the 5th RHNA allocation was established in 2012 while the severe economic effects of the “Great Recession” were still adversely affecting growth. As a result, the 5th RHNA was uncharacteristically low. For comparison, SCAG’s 4th cycle (2006-2013) RHNA allocation was approximately 700,000 units.

Second, for the 6th cycle the State made a major modification to the process for determining RHNA allocations. In prior RHNA cycles, total housing need was based only on projected population growth. However, for the 6th RHNA cycle the State added existing need to the total RHNA calculation. Existing need includes households that are currently overcrowded (defined as more than one person per room) or are overpaying for housing (defined as more than 30% of gross income). The total 6th cycle RHNA allocation for the SCAG region is comprised of the sum of existing need and projected need, as follows:

| Existing need: | 577,422 units |
| Projected need: | 764,405 units |
| Total need:     | 1,341,827 units |

As seen from this breakdown, if existing need were not included (as was the case in prior RHNA cycles) the total need would be similar to the 4th cycle RHNA.
