Supply Storage

WHY?

Supplies won't help if you can't get to them!

Flashlights, portable radios, first aid kits and other emergency supplies are essential after earthquakes and other disasters, but only if you 'can get to and use them. Emergency supplies aren't very useful if you're unable to get to them when you need them. Store your emergency supplies in a location that you can access.

Consider the options presented on the back side of this Focus Sheet. Remember, supplies won't help you if you can't get to them.

These are only suggestions for preparing your family. Use discretion and common sense in your preparations.

Storage

There are several options for storing your emergency supplies, including:

- Backpacks
- Duffel bags
- Heavy plastic trash cans with wheels
- Other containers

One of the most important considerations in storing your supplies is determining a location that you'll have access to after a major earthquake or another disaster. At least two different locations are recommended.

Identify the safe spots in your house as you did when you developed your family earthquake plan and conducted your home hazard hunt. Then, determine the locations in which you spend the most time and to which you'll have easy access.

Your options may include storing the supplies in the following locations:

- Under your bed
- In a hallway closet
- In the den
- In another location
- In more than one location such as in a backpack to take with you if you have to leave your home and in the pantry for use while you're at home

You also might consider storing some of the supplies in different locations. For example:

<table>
<thead>
<tr>
<th>Supply</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flashlight</td>
<td>under/by your bed</td>
</tr>
<tr>
<td>Sturdy shoes</td>
<td>under/by your bed</td>
</tr>
<tr>
<td>Portable radio</td>
<td>under/by your bed</td>
</tr>
<tr>
<td>Eye glasses</td>
<td>under/by your bed</td>
</tr>
<tr>
<td>Canes, walkers, etc.</td>
<td>by your bed</td>
</tr>
<tr>
<td>Adjustable wrench</td>
<td>at the gas meter</td>
</tr>
<tr>
<td>Food, water</td>
<td>in the pantry</td>
</tr>
</tbody>
</table>

Remember, however, that food and water require special considerations:

- Empty open packages of sugar, flour, dried fruits and nuts into screw-top plastic jars or air-tight containers to avoid problems with insects and rodents.
- Place food and water stored in the pantry on lower shelves to prevent damage to the container or loss of the item.
- Store your food and water in a dark, cool place to increase their life span.
- Do not place plastic containers directly on cement floors. Lead and other contaminants may leak into the food or water if the container is placed on cement.

ESP Family Steps to Survival

This action sheet is produced as part of the Earthquake Survival Program (ESP). ESP is an awareness campaign designed to increase individual and home earthquake preparedness. ESP was developed by the County of Los Angeles. The California Governor's Office of Emergency Services (OES) and representatives from Imperial, Inyo, Kern, Los Angeles, Mono, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara and Ventura counties assist in the development of campaign materials and coordination of the campaign.
