

If the AC unit or heat pump is located inside the setbacks, the unshaded area of the diagram, the installation will need a building permit. If the AC unit or heat pump is located within the setbacks, the gray area of the diagram, the installation will need approval from the Planning Department along with a building permit. Also if the unit is not ground mounted, or there are multiple units, planning approval is required. Contact the Planning Department for more information on the Director's Design Review Permit Process.
