

Sanitary Sewer Stream Crossings

Sanitary Sewer Improvements

Hello Neighbor!

We have exciting news that improvements to the sanitary sewer infrastructure in your neighborhood are being planned.

The Arlington City Council recently approved a construction contract between Arlington Water Utilities and Flow-Line Construction, Inc., of Dallas, Texas, for the 2017 Sanitary Sewer Stream Crossings Phase 2 (Bardin Road) Project. This project includes replacement/rehabilitation of the sanitary sewer mains that are exposed and are in high risk of failure due to the channel erosion at Rush Creek and Bardin Road.

The sanitary sewer mains selected for replacement have been determined to be in poor condition which could potentially result in sanitary sewer overflows.

What area of my neighborhood will be involved in the project? Attached is a map of this project's location. The construction will take place in the right-of-way just to the east of the intersection of Bardin Road and Edge Creek Lane. The construction staging area will be at the entry to the right-of-way. Road closings and detours are not expected to be part of the project.

What are the planned improvements? The improvements consist of constructing approximately 477 linear feet of 8-inch to 36-inch sanitary sewer mains, minor drainage improvements, and 7,890 square feet of a mechanically stabilized earth bank protection system. The bank stabilization will stabilize the channel and protect the sanitary sewer main from further erosion damage. This project will extend the life of the public facilities, reduce maintenance costs, and improve service to these areas.

So, what's ahead? Construction will begin early March. The project is expected to take approximately 150 calendar days, or about five months.

How can I find out more? To learn more about the project and its current stage, please contact the designated city representative.
