ADDENDUM #2

RFP 20-012

Virtual Server Environment

This addendum is being issued to address questions submitted on RFP 20-012.

Q1. Section 3.4 - What is this referring to? I don't think there is any construction involved in this process or pressure recording/drawings. Please confirm.
A1. This is not particularly relevant per our IT Director.

Q2. Section 3.1.3 - States that the solution must support multiple hypervisors. I assume it just means multiple hypervisors in clusters. Not different OEM/Vendor hypervisors.
   a. For example - You are not asking for the solution to support Hyper-V AND VMWare. Is this a correct statement?
A2. We don't want to be restricted to VMWare or any other vendor. If we need to spin up a Hyper V server or anything else, we want that capability.

Q3. It sounds like you are looking for a software only solution to support different hardware vendor options. We have the ability to bundle the software pre-installed with SuperMicro, HP and Penguin computing however from the sound of it, you will be procuring hardware separately from this RFP. Please confirm.
A3. No, this RFP is for hardware as well. We just don't want proprietary hardware. It should be vendor/manufacturer neutral.

Unless already submitted by posting, this addendum should be singed and returned with your proposal.
