## **2022 Legislative Priorities (Recovery – Retention – Recruitment)**

A thriving downtown is at the heart of Pullman's focus and vital to Pullman's continued priorities for recovery, retention, and recruitment of businesses and future commercial sustainability. This year by strategically narrowing the priorities that will directly affect the community members the most, the City of Pullman can obtain achievable priorities and goals.

### **Economic Development**

- **Downtown Revitalization**: This continues to be Pullman's number one priority. The City has made strides going forward in the Downtown Master Plan and wants to continue the economic development further. Continued revitalization requires investment into design improvements, understanding and responding to market forces, promotion, and organized leadership.
- **Railroad Tracks**: Repurpose the railways within the city limits to maximize flexibility and enable activation of projects for economic development, flood control, creation of city parks, access to waterways, public safety and assist with Washington State Ratings Bureau Fire Rating.
- **Pullman-Moscow Regional Airport**: Continued support of terminal construction, expansion and growth of the airport makes Pullman reliable transportation for businesses, residents, and visitors.

### **Transportation Safety Projects**

- **North and/or South Bypass**: By requesting \$5,000,000.00 for a North or South bypass design, Pullman can focus on removing heavy traffic in the downtown area. This would greatly improve walkability downtown and fulfill the revitalization priority.
- **Highway 26 Passing Lanes**: City Council asks that the Legislature add passing lanes on State Highway 26. This project will not only save the lives of motorists but provide safe passage to and from Pullman.

### **Livability**

- **Housing and Affordability**: The rise of housing costs continues to create a shortage of affordable housing in our community and across the state. Incentivizing developers to build entry-level and affordable housing would allow for more opportunities for people to stay in Pullman long-term or relocate.
- **Mental Health**: Pullman continues to recognize the need for mental health professionals. Accepting certification from other states and adding telehealth options would greatly increase the accessibility of much needed mental health resources.
