In 2017, the City of Aurora began a comprehensive and detailed update to the 2007 NEATS systems level multimodal transportation plan. This effort is intended to:

1. Define/refine the general corridor alignments identified in the existing Aurora Comprehensive Plan (2009 and 2018) to more specific roadway alignments, cross sections, phasing needs, interchanges, transit components and trail systems.

2. Account for approved development plans, pending and expected development proposals, and overall transportation system needs.

3. Identify needed transportation facilities and programs for the near-, mid- and long-term.

4. Include a stakeholder and public outreach process.

Transportation Plans Considered Include:

- 6th Avenue Parkway Extension Final Design (2018)
- Arapahoe County Bicycle and Pedestrian Master Plan (2017)
- Current DRCOG Metro Vision Plan (2017)
- Colorado Aerotropolis Vision Study Infrastructure (2016)
- DRCOG 2040 Regional Transportation Plan (2016)
- Street Construction Priority Program for the Area South of DIA (2015)
- Adams County Transportation Plan (2012)
- Arapahoe County 2035 Transportation Plan (2012)
- Aurora Bicycle and Pedestrian Master Plan (2012)
- Northeast Area Transportation Study (2007)

Funded Area Planning Efforts:

- I-70 and Picadilly Environmental Assessment Reevaluation
- 1601 System Level Feasibility Studies:
  - I-70 and Watkins Road
  - I-70 and Monaghan Road (Airpark)
- I-70 Systems Study, E-470 to Strasburg
- E-470 Widening, Quincy to I-70 Preliminary Design
Study Area with Planned Developments

Updated September 26, 2018
The 2040 study area households and employment will generate these 2040 daily traffic volumes.
This map and associated summary table shows a comparison of 2040 household and employment projections relative to buildout household and employment projections by quadrant.

- Quadrant 1 is projected to have the most employment and Quadrant 2 to have the most households at buildout.
- Quadrant 2 is projected to have the highest percentage of households and employment in 2040 relative to the buildout forecasts.

**Source:** Economic & Planning Systems.
The 2040 recommended roadway network is necessary to accommodate the forecasted 2040 volumes within the NEATS study area.
Potential intersection configurations are shown that would provide efficient north-south traffic flow along the Harvest/Powhaton corridor.

Future Transit Routes

Future Transit Routes along the E-470 corridor.
**Mobility Hub Types**

**Type 1 Mobility Hubs**

**TYPE 1 MOBILITY HUB**
- Urban/activity center density areas
- Intersection or mid-block locations
- 10-15 minute connection to A-line stations – 61st and Peña (existing), 72nd and Dunkirk (future)

**TYPE 1 MOBILITY HUB (MID-BLOCK)**
- Uber/Lyft connections
- Bike sharing
- Short and long-term parking
- Safe intersection crossings
- Secure bike storage
- Small format retail
- Electric vehicle charging
- Shared ride waiting areas

**TYPE 1 MOBILITY HUB (INTERSECTION)**
- Enhanced bus stops with real-time information
- Designated bus lanes and priority signals
- Secure bike parking
- Car sharing
- Off-street bike path
- Public art
- Transit and community information kiosk

**Type 2 Mobility Hubs**

**TYPE 2 MOBILITY HUB**
- Suburban density areas
- Off-street locations
- Some Type 1 services, as appropriate
Pedestrian/Bicycle Network and Transit Hub Interface
The City will look to acquire funding through the DRCOG Transportation Improvement Program (TIP) process for improvement projects that have a strong potential to qualify for federal and state funding. Other funding mechanisms have been identified that will be used, as appropriate, for implementation of the recommended infrastructure improvements. These funding mechanisms include:

- Regional Transportation Authority
- Special Districts
  - Metropolitan District
  - General Improvement District
- USDOT BUILD and INFRA Grants
- Aurora Regional Improvements Mill Levy
- Developer Agreements
- Bonding

A transportation study of the northeast area of Aurora (NEATS Refresh) is nearly complete. The city of Aurora began this study in September 2017, and has since conducted traffic modeling to forecast and better understand future travel demand and infrastructure needs in the area for the near, mid, and long-term (year 2040).

This evening’s open house is the final public meeting planned for this NEATS Refresh study. Following review of public and agency comments gathered earlier in the study, recommendations for corridor alignments, laneage, interchanges, transit corridors, mobility hubs, bikeway and trail components have been identified. Please review the study recommendations and other supporting information displayed around the room. Then, discuss your thoughts with project staff and document your comments using one of the methods described below.

NEXT STEPS
During the next month, public comments will be considered before final recommendations are presented to city council members. Upon their approval, NEATS Refresh recommendations will be included in the Aurora Places 2018 Comprehensive Plan. Typical section recommendations will not be included in Aurora Places; they will continue to be discussed and considered by city staff as guidelines are planned for new development.

COMMENT OPPORTUNITIES
- Ask questions or provide comments to project personnel (with name tags).
- Fill out a comment sheet and drop it off at the sign-in table or send it in later.
- Use the contact information to the right to provide your comments.

DOCUMENT AVAILABILITY
Public meeting displays can be downloaded from the study web page: www.auroragov.org/NEATS
How are you involved in the northeast Aurora area?

- Live here
- Own property
- Work here
- Development interests
- Represent an agency
- Travel through

Do you agree with the recommended 2040 roadway network, or suggest any revisions to it? What roadway and intersection/interchange improvements do you see as the greatest future need in this area?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

What comments do you have regarding the recommended alternative typical sections?

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________

Please provide your thoughts regarding the planned trails and bikeways, and the potential transit corridors and mobility hubs proposed for the NEATS area.

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
Please provide general suggestions and comment regarding this study.
