

Water Conserving Plumbing Fixture Self Verification Form

Building Permit # _____

On or before January 1, 2017, non-compliant plumbing fixtures in any single-family residential real property shall be replaced by the property owner with water-conserving plumbing fixtures per California State Law (Section 1101.1-1101.8 Civil Code). All single-family dwellings lawfully constructed after January 1, 1994, are considered to have compliant plumbing fixtures. For the purposes of this regulation, a non-compliant plumbing fixture means:

1. Any toilet (water closet) that uses more than 1.6 gallons per flush
2. Any urinal that uses more than 1.0 gallon per flush
3. Any shower head with a flow capacity of more than 2.5 gallons per minute (gpm)
4. Any bathroom faucets that emits more than 2.0 gpm @ 60 psi nor less than 0.8 gpm @ 20 psi

On April 1, 2015 the Governor's Executive Order B-29-15 tasked the California Energy Commission (CEC) with establishing standards that improve the efficiency of water consuming fixtures. On April 8, 2015 the CEC published new thresholds for fixtures. Those new thresholds are shown below:

1. Any toilet (water closet) that uses more than 1.28 gallons per flush
2. Any urinal that uses more than 0.125 gallons per flush
3. Any shower head with a flow capacity of more than 2.0 gallons per minute (gpm)
4. Any kitchen faucets that emits more than 1.8 gpm @ 60 psi
5. Any bathroom faucets that emits more than 1.2 gpm @ 60 psi nor less than 0.8 gpm @ 20 psi

In order to grant final approval on your permit, it is necessary to verify the replacement of non-compliant plumbing fixtures with compliant fixtures. This form allows the property owner or the licensed contractor (authorized representative) the ability to self-verify compliant water conserving plumbing fixtures. Self-verification allows the authorized representative to verify installation of fixtures when the City of Rohnert Park Inspector does not have access to the interior of the dwelling (such as re-roof projects or other exterior work that requires a building permit).

By signing this document, the property owner or the licensed contractor certifies to the City of Rohnert Park Building Division that water conserving plumbing fixtures have been installed prior to final inspection on the above referenced project as specified above.
