

## The Well Child Visit Schedule

The American Academy of Pediatrics recommends well child visits at the following times:

- Before your baby is born (“prenatal visit” for first-time parents).
- Before your newborn is discharged from the hospital or birth center.

Your baby should be seen 2 to 3 days after discharge from the hospital for a “weight check” appointment.

- A visit at about 2 to 4 weeks of age and at 2, 4, 6, 9, and 12 months of age.
- Visits at 15, 18 and 24 months of age.
- Visits once per year every year after age 2 through early adulthood.

## The Well Child Visit

Well-child visits provide you and your child a chance to get to know your medical providers and help to keep your child healthy. They allow your doctor to evaluate your child’s general health, growth, and development. Your child can receive any needed immunizations (shots) and lab tests at the visit.

We have multiple clinic sites in the Eugene-Springfield area.
