Keeping Your Home Cool:

If you have an air conditioner, make sure it is installed and working. Set air conditioners to the setting most comfortable to you, preferably between 72°F and 79°F. Block the sun by using awnings or closing curtains and blinds during the day. Avoid using a fan as your main cooling source — especially when it is 90°F or more.

If you don't have a place that is cool during the hottest parts of the day, LCPH recommends visiting a place that has air conditioning, e.g., a library, community center or shopping center, or a park with plenty of shade and/or a water feature, like a splash pad.

Eugene Community Centers are open for regular hours:
