

The SCL Compounding Program MUST be used for compound prescriptions over \$ 100 and/or exceeding four compound medications per member per month.

Millions of patients have unique health needs that require a compounded prescription with several ingredients. For these patients, personalized medication solutions are the way to better health. A compounding pharmacist can meet individual needs of children and adults. Whether it's an allergy to a dye or ingredient, or a need for a different strength or dose, compounding pharmacists provide patients with solutions to their medication needs. Script Care, LTD and Artiria joined together to ensure that SCL Plan Sponsors have access to the highest quality medication at the lowest cost.

Artiria specializes in preparing custom compounded medications for our patients as per physician's prescription. They make custom medications that can be used for a variety of conditions. Examples include people who cannot swallow tablets, hormone replacement for men and women, and people who suffer from pain and have not responded well to other therapies. We believe our patients are unique and deserve unique solutions to their problems.

What does this mean to me?

If your physician prescribes a compounded medication and the cost exceeds \$100, the prescription claim will reject at your local pharmacy.

What are compounding medications?

| | |
|---|-------------------------------------|
| Creams, Lotions, and Gels | Medicated Lollipops |

How do I get started?

Simply call the SCL Compounding Program at **1-800-880-9988**. We will then verify your benefits and provide further instructions.

What should I do when it is time to reorder my prescription and supplies?

An Artiria representative will contact you. They will verify your order and prescription coverage before mailing your next shipment. If you have moved or your phone number has changed, please notify the SCL Compounding Program promptly to continue the reorder service uninterrupted.

If you have questions about your compounded medications, please contact the SCL Compounding Program at **1-800-880-9988** for more information.
