FIRE SAFETY STANDARDS
FOR MOBILE FOOD FACILITIES

Within the City Limits of Loma Linda:
Authority Cited: California Fire Code and Office of the State Fire Marshal

This document provides guidance regarding Fire Code requirements applicable to mobile food facilities (i.e. food trucks, carts, etc.) operating within Loma Linda. These requirements are in addition to applicable food safety regulations which, within San Bernardino County, are enforced by the County Health Department.

Mobile food facilities that are inspected and found not in compliance with the requirements of this standard will not be allowed to continue operating until all deficiencies are corrected.

Compliance is as easy as 1-2-3

1. If any cooking oil or grease is used, animal or vegetable, then a commercial kitchen Type 1 Hood and UL300 extinguishing system is required.

2. If any cooking oil or grease is used, animal or vegetable, a Class K fire extinguisher is required.

3. Hood extinguishing systems are required to be serviced at least once every six months. Class K fire extinguishers shall be serviced annually.

Mobile Food Trucks participating in permitted special events (festival, carnival, street fair, farmers market, etc.) within Loma Linda shall be in compliance with the following regulations:

• Loma Linda Municipal Code (Obtain a current Business License issued by City of Loma Linda)
• California Fire Code, 2013 Edition (CFC)
• Commercial cooking equipment that produces grease laden vapors shall be provided with a Type I Hood (a kitchen hood for collecting and removing grease and smoke), in accordance with this code, and equipped with an automatic fire extinguishing system that meets all requirements of UL300.

Automatic fire extinguishing systems shall be serviced at least every six (6) months and after activation of the system. Inspection shall be by qualified individuals and an inspection tag shall indicate date of last service.

In addition to having a Class K fire extinguisher, one current 2:A10BC extinguisher shall be provided.

All LP (Propane) gas lines shall be checked regularly to ensure against leakage.
