Subject: Message Trailer on Wallingford Rd

Hey Bill,

As requested, I attached two useful reports for from the message trailer that is set up for eastbound traffic as it proceeds down the hill on Wallingford Rd toward #860. Keep in mind, this only records data for the EB lane and the dependent message was set up for passing motorists in the following way:

1. Under 25mph speed limit: "Thank you" is displayed
2. 25-29mph: Tells you the speed limit
3. 30-35mph: Tells you to "SLOW DOWN"
4. 35mph+: Tells you "TOO FAST"

With that said the extended speed summary report showed that from 4/26/21 to 6/14/21, the average EB lane speed as vehicles approached the message trailer was 30.39mph and the 85th percentile speed was 35.63mph with a 9.8%-24.3% of cars slowing down as they passed by the trailer.

The Volume by Time report shows an average daily vehicle volume from 4/26/21 to 6/14/21 of 952 vehicles for the EB lane only.

If you have any questions, or would like to see if we can get any other data, let me know.

Thanks
