Mill Creek, WA 98012

Subject: Request for Letter of Water and Sewer Availability to Proposed 10 Unit Townhome Project,
AKA - Creekside West

Dear Ms. Amrine,

The referenced proposed project developer's agent has requested the Silver Lake Water and Sewer District (SLWSD) write a letter describing the availability of water and sewer service to their project site. SLWSD has water and sewer facilities extensions near the proposed subdivision. Improvements on and off-site may be necessary to provide for the proposed development layout and finalization of these requirements will be determined when the developer enters in to an agreement with SLWSD for extension of our facilities.

When installed our facilities will have the capacity to provide water and sewer service to meet their service needs. Service connection would be conditioned on full compliance with all District Standards, Specifications and Requirements.

Sincerely,

A handwritten signature in black ink that reads "Richard Q. Gilmore". The signature is fluid and cursive, with a long horizontal line extending to the right.

Richard Q. Gilmore, P.E.,
District Engineer
425-337-3647

Electronically transmitted, no hard copy mailed.
